21.363.3 For Discussion and Resolution: To Approve design statement for a new footpath behind the Oak Tree which is proposed to replace the pathway that is currently being constructed as part of the Southfield housing development.

SD highlighted the design statement which had been circulated to Councillors. RE mentioned that the design statement requires a few modifications and it needs to highlight that the application itself is not a request to demolish what has been built already.

RW queried if there were any requirements for a handrail to go in and support the path. RE responded the only section where one would be required would be adjacent to the ditch where the path would take a 90 degree turn from B430.

RE highlighted that if approved he could submit the application tomorrow.

The Council were extremely impressed and thankful for the work and support RE had provided to move this proposal forwards.

The resolution to approve the design statement for a new footpath behind the Oak Tree which is proposed to replace the pathway that is currently being constructed as part of the Southfield housing development was proposed by SD and seconded by NM, all Councillors were in agreement.
