

Oak Tree Path – 1 September 2021 Parish Council Meeting

CDC are still supportive of our application but Iain Osenton now requests that the application is supported by an Arboriculturalist who can provide both a BS5837:2012 method statement and site supervision. This is a professional job and Roger has been contacting such specialists. It is not so easy to find one not already involved in a housing development. However, we may find one in a day or two and would like the flexibility to engage him/her immediately. The rate is £600 - £800 Per day. I would suggest we allow a spend of up to £800. We intend to request costs in any settlement with OCC.

Resolution to approve payment of arboriculturalist fees of up to £800 to determine the effect of the Alternative Pathway on the veteran oak tree.
